Nov 2020 to Nov 2021

- Introduced some agile principle in our development workflow like daily meeting, retrospective, and estimation of tickets.
- Reduced the production time of my team with shared of Git good practices.
- Organised monthly meetings to demonstrate new concepts and best practices in development, such as SOLID principles, dependency injection, and unit testing, to the team.
- Stack: C#, ASP.NET, .NET Framework, .NET 5

Junior Developer C#/.NET – EDISYS (France)

Oct 2018 to Nov 2020

- Developed a sales prediction application with ASP.NET, ML.NET & Vue.js
- Implemented unit tests using the AAA pattern whenever a new bug appeared.
- Stack: C#, .NET Framework, WPF

EDUCATION

Master's Degree - Software Engineering Manager - CESI Alternance Oct 2020

Bachelor's Degree - Maintenance and IT Support Manager - CESI Alternance Sept 2018

Professional Development: Mastering the deployment process with Docker and DevOps concepts

PROJECTS

React Material Symbol Icons library – 2023

A React library for using Google's Material Symbols. Testable with Storybook, it allows changing controls. All icons are accessible through a single component, with customisable style properties like fill, weight, and stroke.
